SEQ ID NO 184880
APPLICANT: Li, Ping
TITLE OF INVENTION: Rice Nucleic Acid Molecules and Other Molecules Associated With
TITLE OF INVENTION: Plants and Uses Thereof for Plant Improvement
FILE REPERENCE: 38-21(53221)B
CURRENT APPLICATION NUMBER: US/10/437,963
CURRENT FILING DATE: 2003-05-14
NUMBER OF SEQ ID NOS: 204966
SEQ ID NO 133423
LENGTH: 149
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ö

glutelin 2 precursor (clone pMB119) - maize
NiAlternate names: 27K zein; alcohol-soluble reduced glutelin; Zc2 protein
NiAlternate names: 27K zein; alcohol-soluble reduced glutelin; Zc2 protein
C;Species: Zea mays (maize)
C;Accession: A93557; A29017; $12144; A23014
C;Accession: A93557; A29017; $21244; A23014
Nucleic Acids Res. 13, 1493-1504, 1985
A;Title: Nucleic acid (cDNA) and amino acid sequences of the maize endosperm protein glasserence number: A93557; MUID:85215560; PMID:3839076
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               A; Molecule type: mRNA
